## the roller skate wheel locker

skateskooties.com | 720-773-0079 | grrlgonzo@skateskooties.com

**Roller skaters love being on their skates every where, every day.**

But not every place is safe to skate. Gravel paths, pitted asphalt, grassy hills, and cracked sidewalks are just a few of the places a skater should avoid skating.

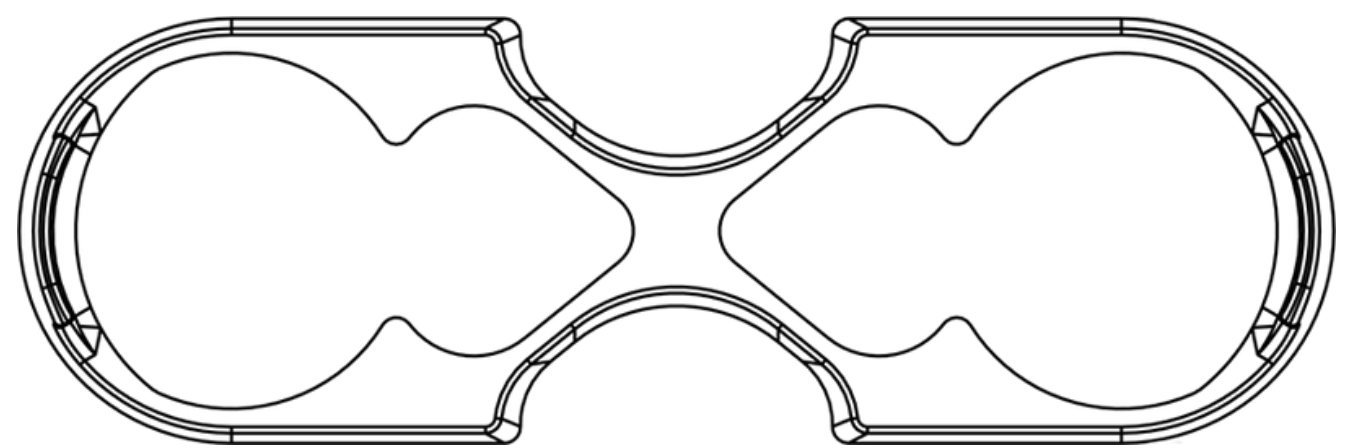

Skooties are a roller skate wheel locker, designed for easy-on, easy-off use. This allows a skater to "walk" over uneven surfaces without getting back into shoes.

### USES FOR SKOOTIES!

- **Stability on uneven surfaces**
  - Gravel
  - Grass
  - Asphalt
- **Learning skate tricks**
  - Park skating
  - Roller dance
- **Back stage at performances**
  - Avoid cables and stands
- **Roller derby medical needs**
  - Get players off track safely
- **"Walking" in no-skate zones**
  - We call it Skooting!

*Customer sale information current: June 2023*

### *Skooties Patent-Pending Design*

Designed to provide stability while walking, Skooties feature five key features:

- "X"-shaped wheel chocks prevent wheel rotation
- Exterior tread bands for traction
- Inside edge tabs allow for easy-on, easy-off use
- Anti-slip edges and inside bands hold Skooties in place on wheels
- Made of tear-resistant silicone for maximum durability and strength
